SUMMARY

The 19th Summer School "Multi-Level Governance for Climate and Energy Security" is designed to delve deep into the key aspects of energy transition, guided by the innovative "Ds" of Energy Transition approach. The "bDs" of Energy Transition, serve as a comprehensive framework to address these challenges, each playing a pivotal role in reshaping the energy landscape of SEE:

- Decarbonization
- Decentralization
- Dematerialization
- Digitalization
- Democratization
- Dialogue

ELIGIBILITY

Eligible participants must be from: Albania, Bosnia and Herzegovina, Bulgaria, Croatia, Kosovo*, Moldova, Montenegro, North Macedonia, Poland, Romania, Serbia, Slovenia.

TARGET GROUP

1. All young people (18-30 years old) can apply.
2. Young policy-makers and civil servants from governmental institutions, embassies and international organizations,
3. Officers working in authorities administration (national/ regional/ local) in SEE,
4. Final year Bachelor, Master and PhD students in the relevant field,
5. Representatives of NGOs,
6. Mid-career professionals from energy companies.

HOW TO APPLY?

Fill in the online application form by July 10th, 2024. Application form is available at [THIS LINK](#) or visit www.reic.org.ba for more information.

METHODS OF WORK

Lectures, workshops, case studies, participatory approach.

FEE INFO

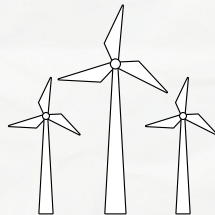

No participation fees. Full fellowship includes costs of full board accommodation (shared rooms). Participants will cover only cost of their transport to/from the venue.

LANGUAGE

English

*This designation is without prejudice to positions on status, and is in line with UNSC 1244 and the ICJ Opinion on the Kosovo Declaration of Independence.

ABOUT THE LOCATION

The summer school will take place in Ethno village Caždaci, municipality Vitez, in the central part of Bosnia and Herzegovina. This sustainable complex is built entirely of natural materials and is located next to the mini hydro power (MHP) plant. It uses biomass, geothermal and solar energy. There is also a model of wind power plant. The entire facility is being heated on water pumped (by the newest technology) from nearby wells three meters deep in the ground. The Village is a great example how renewable energy can enable sustainable development of the local community.

19th International Summer School "Multi-Level Governance for climate and energy security" is organized with the support of the EU4 Energy Transition: Covenant of Mayors in the Western Balkans and Türkiye project. This project is co-funded by the European Union and the German Federal Ministry for Economic Cooperation and Development. In the Western Balkans, the project is implemented by Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) as part of the Open Regional Fund for South-East Europe: Energy, Transport and Climate Protection.
